REEGAN RAJASEKAR A

FULL STACK ENGINEER

+91 70940 93096 · areeganrajasekar@gmail.com · reegan.is-a.dev · linkedin.com/in/reeganrajasekar

SUMMARY

Full Stack Engineer with 3.5+ years of experience in building secure, scalable web and mobile applications using .NET (C#), React, Angular, SQL Server, MySQL, and PostgreSQL. Strong experience in REST API development, database optimization, cloud deployment, and OWASP security practices. Proven ability to deliver end-to-end solutions from design to production with a focus on performance, security, and reliability. Currently building production AI features — MCP server, RAG pipelines and agents on OpenAI and Azure AI Foundry — with a focus on cost control and security.

EXPERIENCE

Adaptive Bizapp Systems · Tiruchirappalli — Feb 2026 – Present
Software Engineer II

- Built an MCP server and RAG pipeline over ERP and payroll data (.NET Framework, FastAPI, FastMCP), exposing 100+ tools to AI agents.
- Integrated AI services with existing .NET Framework ERP and payroll applications without altering core business logic.
- Built proactive issue ticketing and a RAG assistant for the support team, reducing repetitive client issues.
- Deployed containerised agents on Docker using OpenAI and Azure AI Foundry, with role-based access, Key Vault secrets, prompt-injection checks and per-tenant rate limits.
- Reduced token usage and model cost through caching, context budgeting and per-tenant caps.

SCION · Thanjavur — Dec 2024 – Feb 2026
Software Engineer

- Developed and maintained secure backend services using .NET Core (C#), SQL Server, and Redis, improving system performance and reliability.
- Built responsive web applications using React, fully integrated with REST APIs and cloud services.
- Designed and deployed Azure cloud infrastructure, implementing CI/CD pipelines using Azure DevOps, reducing deployment time and manual errors.
- Implemented OWASP Top 10 security practices, including secure authentication, input validation, and API hardening.

UBTIINC · Chennai — Jun 2023 – Dec 2024
Junior Software Engineer

- Built an Internal Employee Management Portal from scratch to production using .NET Core and Angular.
- Designed and developed a full ESG Dashboard using .NET and SQL Server.
- Optimized application performance and ensured secure data handling.

PROJECTS

Warehouse Management System · Adaptive — Built on .NET Core and ASP.NET MVC for warehouse operations.
IoT-Based Smart Security & Locker Access Control System (Vsafe) · SCION — Designed and developed a secure IoT-based smart access control application using .NET Core backend. Implemented real-time device communication, user authentication, and OWASP-compliant security practices.
ESG Analytics Dashboard · UBTI — Developed a data-driven ESG dashboard to visualize environmental, social, and governance metrics for internal stakeholders.
Secure eCommerce Web Application · SCION — Designed and developed a full-stack eCommerce application with secure user authentication, product management, cart and Admin Portal.

SKILLS

Frontend: React, Angular, Tailwind CSS, HTML5, CSS3, JavaScript, TypeScript
Backend: .NET Core (C#), ASP.NET MVC, RESTful APIs
Databases: SQL Server, MySQL, PostgreSQL, Redis
Security: OWASP Top 10, Authentication & Authorization, Secure API Design
Cloud & DevOps: Microsoft Azure (App Services, Azure SQL, Blob Storage), Azure DevOps, CI/CD Pipelines, Docker, Kubernetes, Linux
Tools & Others: Git, Firebase, Postman, Agile/Scrum

CERTIFICATIONS

Fullstack Development — ICT (IBM)
FullStack JS — SIRIUS (CDW)
FullStack Development — UDEMY

EDUCATION

B.E — CSE (83%) · St. Joseph's College of Engineering and Technology, Thanjavur · 2019 – 2023

AWARDS & RECOGNITION

Best Employee of the Quarter — SCION
Awarded for outstanding performance, system optimization, and delivering high-impact production features.
Spotlight Award — UBTIINC
Recognized for exceptional individual contribution to critical project delivery and performance improvements.
